

The FAA Safety Team presents:

Fit to Fly?

Even a minor illness suffered in day-to-day living can seriously degrade performance of many piloting tasks vital to safe flight. Illness can produce fever and distracting symptoms that can impair judgment, memory, alertness, and the ability to make calculations. Although symptoms from an illness may be under adequate control with a medication, the medication itself may decrease pilot performance. Don't miss this opportunity to hear featured speaker Dr. Ross, a local FAA Aviation Medical Examiner (AME) and active pilot, as he discusses how important it is to ensure you are healthy enough to fly! He will explain how even minor illnesses and over-the-counter medications degrade your flying skills. Attend this informative briefing and ask the doctor questions regarding medical certification. Click on the link below and register TODAY!

Directions: From the North: Take Rt. 295 South to Exit 9A to Rt 146 South. Turn on Rt 116 South. Merge to W. Greenville Rd. Left on Albion Rd. From the South: Take Rt 295 North and follow directions from above. For easy free parking please the old main terminal building lot.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
